Effect of Inward Foreign Direct Investment on Income Inequality. In this paper, the authors analyze how FDI affects income inequality in various regions. They find that FDI can lead to increased income inequality if not properly managed. The authors also discuss the role of government policies in mitigating the negative effects of FDI on income distribution. The paper concludes with recommendations for policymakers on how to balance the benefits of FDI with the need to protect domestic workers and reduce income inequality.

Keywords: FDI, income inequality, labor market, policy intervention.
