John Logie Baird, Scottish engineer and inventor, was a pioneer in the field of television. Born on 13 August 1888 in Helensburgh, Scotland, he is known for inventing the mechanical television set in 1924. Baird's work significantly contributed to the development of television technology.

Baird's inventions included the mechanical television system, which he demonstrated to the world in 1926. He was also responsible for the development of radar technology and fiber optics. Baird's achievements were recognized with numerous awards and honors.

Baird's legacy is celebrated not only in Scotland but globally, as his inventions laid the foundation for modern television technology. His contributions to science and engineering continue to inspire future generations.
