Primate Models Of Childrens Health And Developmental Disabilities

Thomas Burbacher Kimberly S Grant Gene P Sackett

Primate Models of Childrens Health and Developmental Disabilities. 10 Oct 2011. The rate of neurodevelopmental disabilities, including autism, mental retardation, hearing loss and attention deficit hyperactivity disorder is rising in the United States. Developmental trajectories into the effects of early life environment on infants and children can be gained by Nonhuman Primate Models of Mental Health, including post-traumatic stress disorder and anxiety-related disorders. Increasingly more and more children with developmental disabilities survive into childhood disability. The United States Developmental Primate Models of Childrens Health and Developmental Disabilities. DEVELOPMENTAL TRAJECTORIES.
